Volume 75 1977

Table of Contents

No. 1 pp. 1–318 issued on May 2, 1977
No. 2 pp. 319–626 issued on May 16, 1977

1 Demonstration of Binding Sites for Divalent and Trivalent Ions on the Outer Surface of Chromaffin-Granule Membranes
S. J. Morris and R. Schober

13 Interaction of Glycolysis and Respiration in Perfused Rat Liver. Changes in Oxygen Uptake Following the Addition of Ethanol
R. G. Thurman and R. Scholz

23 The Chemical Structure of the Lipid A Component of Lipopolysaccharides from *Chromobacterium violaceum* NCTC 9694
S. Hase and E. Th. Rietschel

35 On the Conformation of Serine-Specific Transfer RNA. Studies by Small-Angle X-Ray Scattering and Ultraviolet Absorption of the Molecule in Solution
I. Pilz, F. Malnig, O. Kratky, and F. von der Haar

43 Synthesis of Exported Proteins by Membrane-Bound Polysomes from *Escherichia coli*
L. L. Randall and S. J. S. Hardy

55 Effect of Kirromycin on Elongation Factor Tu. Location of the Catalytic Center for Ribosome · Elongation-Factor-Tu GTPase Activity on the Elongation Factor
G. Chinali, H. Wolf, and A. Parmeggiani

67 Mechanism of the Inhibition of Protein Synthesis by Kirromycin. Role of Elongation Factor Tu and Ribosomes
H. Wolf, G. Chinali, and A. Parmeggiani

77 Catabolite Inactivation of Bakers'-Yeast Uridine Nucleosidase. Isolation and Partial Purification of a Specific Proteolytic Inactivase
G. Magni, I. Santarelli, P. Natalini, S. Ruggieri, and A. Vita

83 Interrelationship in the Regulation of Pyruvate Dehydrogenase and Adenine-Nucleotide Translocase by Palmitoyl-CoA in Isolated Mitochondria
E. Shrago, M. Ball, H. S. Sul, N. Z. Baquer, and P. McLean

91 Guinea-Pig Pancreatic Ribonucleases. Isolation, Properties, Primary Structure and Glycosidation
A. van den Berg, L. van den Hende-Timmer, J. Hofsteenge, W. Gaastra, and J. J. Beintema

101 Modulation by Calcium of the Insulin Action and of the Insulin-Like Effect of Ocytocin on Isolated Rat Lipocytes
D. Bonne, O. Belhadj, and P. Cohen

107 Preparation and Properties of Chromatin from the Silk Glands of the Silkworm *Bombyx mori*
S. Sridhara and J. Daillie

121 The Amino-Acid Sequence of the Major Parvalbumin from Thornback-Ray Muscle
D. R. Thatcher and J.-F. Pechère

133 The Stereochemistry of β-Lactam Formation in Penicillin Biosynthesis
D. W. Young, D. J. Morecombe, and P. K. Sen

149 The Role of Polyamines in Cell-Free Protein Synthesis in the Wheat-Germ System
A. R. Hunter, P. J. Farrell, R. J. Jackson, and T. Hunt

159 The Role of Complexes between the 40-S Ribosomal Subunit and Met-tRNA$_f^{Met}$ in the Initiation of Protein Synthesis in the Wheat-Germ System
A. R. Hunter, R. J. Jackson, and T. Hunt

171 Synthesis of Glucosyl-Dolichol Derivatives in Bakers' Yeast and Their Role in Protein Glucosylation
A. J. Parodi

181 Purification of Prealbumin from Human and Canine Serum Using a Two-Step Affinity Chromatographic Procedure
G. Fex, C.-B. Laurell, and E. Thulin

187 Energy-Coupling of the Transport System of *Escherichia coli* Dependent on Maltose-Binding Protein
T. Ferenci, W. Boos, M. Schwartz, and S. Szmelcman

195 Small-Angle X-Ray Studies of the Human Immunoglobulin Molecule Kol
I. Pilz, E. Schwarz, and W. Palm

201 Enzymes of Flavone and Flavonol-Glycoside Biosynthesis. Coordinated and Selective Induction in Cell-Suspension Cultures of *Petroselinum hortense*
J. Ebel and K. Hahlbrock

211 An Isolation Procedure for the Native α Chain of Bovine Hemoglobin. A Study of the Functional Properties of This Chain and Its Hybrid with the Human β Chain
S. H. de Bruin, J. J. Joordens, and H. S. Rollema

217 Uridine Phosphorylase from *Escherichia coli*. Physical and Chemical Characterization
J. C. Leer, K. Hammer-Jespersen, and M. Schwartz

225 The Exchange Reaction of Peptides R-D-Alanyl-D-alanine with D-[^{14}C]Alanine to R-D-Alanyl-D-[^{14}C]alanine and D-Alanine, Catalysed by the Membranes of *Streptococcus faecalis* ATCC 9790
J. Coyette, J.-M. Ghuysen, and H. R. Perkins

231 Interactions between β-Lactam Antibiotics and Isolated Membranes of *Streptococcus faecalis* ATCC 9790
J. Coyette, J.-M. Ghuysen, F. Binot, P. Adriaens, B. Meesschaert, and H. Vanderhaeghe

241 Further Studies on Basic Nucleoproteins from the Cellular Slime Mold *Dictyostelium discoideum*
M. C. Charlesworth and R. W. Parish

251 Control of Density and Microredistribution of Concanavalin-A Receptors in Rat Thymocytes at 4 °C
E. Karsenti, M. Bornens, and S. Avrameas

257 Isolation, Purification and Properties of an Intermediate in 3-Deoxy-D-*manno*-octulosonic Acid—Lipid A Biosynthesis
V. Lehmann

267 Binding of Carbon Monoxide to Hemoglobin Zürich: Proposal for a Kinetic Model
G. M. Giacometti, E. E. di Iorio, E. Antonini, M. Brunori, and K. H. Winterhalter

275 The Phospho*enol*pyruvate-Dependent Phosphotransferase System of *Staphylococcus aureus*. 1. Amino-Acid Sequence of the Phosphocarrier Protein HPr
K. Beyreuther, H. Raufuss, O. Schrecker, and W. Hengstenberg

287 The Phospho*enol*pyruvate-Dependent Phosphotransferase System of *Staphylococcus aureus*. 2. ^{1}H and ^{31}P Nuclear-Magnetic-Resonance Studies on the Phosphocarrier Protein HPr, Phosphohistidines and Phosphorylated HPr
M. Gassner, D. Stehlik, O. Schrecker, W. Hengstenberg, W. Maurer, and H. Rüterjans

297 The Phospho*enol*pyruvate-Dependent Phosphotransferase System of *Staphylococcus aureus*. 3. ^{1}H and ^{31}P Nuclear-Magnetic-Resonance Studies on the Phosphocarrier Protein HPr; Tyrosine Titration and Denaturation Studies
W. Maurer, H. Rüterjans, O. Schrecker, W. Hengstenberg, M. Gassner, and D. Stehlik

303 Purification and Properties of a DNA-Dependent ATPase Induced by Bacteriophage T4
R. M. Purkey and K. Ebisuzaki

311 Secondary Methylation of Yeast Ribosomal Precursor RNA
R. C. Brand, J. Klootwijk, T. J. M. van Steenbergen, A. J. de Kok, and R. J. Planta

319 Carbon-14 Tracer Studies in Rat-Liver Perfusion Experiments under Conditions of Gluconeogenesis from Lactate and Pyruvate
G. Müllhofer, A. Schwab, C. Müller, C. von Stetten, and E. Gruber

331 Carbon-14 Tracer Studies in the Metabolism of Isolated Rat-Liver Parenchymal Cells under Conditions of Gluconeogenesis from Lactate and Pyruvate
G. Müllhofer, C. Müller, C. von Stetten, and E. Gruber

343 The Influence of Glycyl Residues on the Flexibility of Peptide Hormones in Solution. A ^{13}C-Nuclear-Magnetic-Resonance Study of Luteinizing Hormone-Releasing Hormone (Luliberin) and Its Des-glycinamide^{10} *N*-ethylamide Analog
R. Deslauriers, G. C. Levy, W. H. McGregor, D. Sarantakis, and I. C. P. Smith

347 The Nature of DNA Synthesized in Nuclei from Mouse L1210 Cells
A. Müllbacher and R. K. Ralph

357 A Deoxyribonuclease from *Chlamydomonas reinhardii*. 1. Purification and Properties
G. C. L. Tait and W. J. Harris

365 A Deoxyribonuclease from *Chlamydomonas reinhardii*. 2. Substrate Specificity, Mode of Action and Products
G. C. L. Tait and W. J. Harris

373 Energy-Dependent Transport of Manganese into Yeast Cells and Distribution of Accumulated Ions
L. A. Okorokov, L. P. Lichko, V. M. Kadomtseva, V. P. Kholodenko, V. T. Titovsky, and I. S. Kulaev

379 Protein Arrangement in the DNA Grooves in Chromatin and Nucleoprotamine *in vitro* and *in vivo* Revealed by Methylation
A. D. Mirzabekov, D. F. San'ko, A. M. Kolchinsky, and A. F. Melnikova

391 Structure of Nine Sialyl-Oligosaccharides Accumulated in Urine of Eleven Patients with Three Different Types of Sialidosis. Mucolipidosis II and Two New Types of Mucolipidosis
G. Strecker, M.-C. Peers, J.-C. Michalski, T. Hondi-Assah, B. Fournet, G. Spik, J. Montreuil, J.-P. Farriaux, P. Maroteaux, and P. Durand

405 Urea as a Selective Inhibitor of Argininosuccinate Lyase
J. Menyhárt and J. Gróf

411 Effects of Glucocorticoids on Casein Gene Expression in the Rabbit
E. Devinoy and L.-M. Houdebine

417 Specific Antibodies against α-Melanotropin for Radioimmunoassay. Parallelism between the Immunochemical Cross-Reactions of Melanotropin Structural Analogues and Their Biological Activity
H. G. Kopp, A. Eberle, P. Vitins, W. Lichtensteiger, and R. Schwyzer

423 Dihydroxyacetone Reductase from *Mucor javanicus*. 1. Isolation and Properties
H. Dutler, J. L. van der Baan, E. Hochuli, Z. Kis, K. E. Taylor, and V. Prelog

433 Dihydroxyacetone Reductase from *Mucor javanicus*. 2. Identification of the Physiological Substrate and Reactivity towards Related Compounds
E. Hochuli, K. E. Taylor, and H. Dutler

441 New Protein Reagents. *N*-(4-Chloromercuriphenyl)-4-Chloro-3,5-Dinitrobenzamide and Its Use as a Probe of the Quaternary Structure of Yeast Alcohol Dehydrogenase
J. Diopoh and M. Olomucki

445 The Determination of Molecular-Motion Parameters from Proton-Relaxation-Enhancement Measurements in a Number of Gd(III) · antibody-fragment Complexes. A Comparative Study
D. R. Burton, S. Forsén, G. Karlström, R. A. Dwek, A. C. McLaughlin, and S. Wain-Hobson

455 Initiation of Protein Synthesis in Eukaryotes. Binding to Sepharose-heparin and Partial Purification of Initiation Factors from Krebs II Ascites Cells
C. van der Mast, A. Thomas, H. Goumans, H. Amesz, and H. O. Voorma

465 The Biosynthesis of Long-Chain Fatty Acids. Stereochemical Differentiation in the Enzymic Incorporation of Chiral Acetates
B. Sedgwick and J. W. Cornforth

481 The Biosynthesis of Long-Chain Fatty Acids. Incorporation of Radioactivity from Stereospecifically Tritiated Malonyl Thiol Esters, and the Stereochemistry of the Acetyl-CoA Carboxylase Reaction
B. Sedgwick, J. W. Cornforth, S. J. French, R. T. Gray, E. Kelstrup, and P. Willadsen

497 Determination of the Complete Amino-Acid Sequence of Protein S6 from the Wild-Type and a Mutant of *Escherichia coli*
H. Hitz, D. Schäfer, and B. Wittmann-Liebold

513 Isolation and Characterization of Structural Components of *Bacillus cereus* AHU 1356 Cell Walls
K. Amano, S. Hazama, Y. Araki, and E. Ito

523 Mechanism of Action of Colicin E3. Effect on Ribosomal Elongation-Factor-Dependent Reactions
G. Sander

533 Binding of Ribosomal Proteins to RNA Covalently Coupled to Agarose
H. R. Burrell and J. Horowitz

545 Analysis and Reconstruction of *Xenopus* Ribosomal Chromatin Nucleosomes
R. Reeves

561 Tyrosyl-tRNA Synthetase from Baker's Yeast. Rapid Isolation by Affinity Elution, Molecular Weight of the Enzyme, and Determination of Essential Sulfhydryl Groups
H. G. Faulhammer and F. Cramer

571 L-Ornithine Carbamoyltransferase from *Saccharomyces cerevisiae*: Steady-State Kinetic Analysis
J.-P. Simon and V. Stalon

583 Turnover of Carbamyl-phosphate Synthase, of Other Mitochondrial Enzymes and of Rat Tissues. Effect of Diet and of Thyroidectomy
M. Nicoletti, C. Guerri, and S. Grisolia

593 The Formation of Guanosine-Nucleotide · Elongation-Factor-G · Ribosome Complexes on Free 70-S Ribosomes, 50-S Subunits, and Polysomes. A Comparative Study
M. J. San-Millán, D. Vázquez, and J. Modolell

601 Inter-Relationships between Proton Electrochemical Gradient, Adenine-Nucleotide Phosphorylation Potential and Respiration, during Substrate-Level and Oxidative Phosphorylation by Mitochondria from Brown Adipose Tissue of Cold-Adapted Guinea-Pigs
D. G. Nicholls and V. S. M. Bernson

613 Separation of Two *Salmonella* O-Antigen Polysaccharides by Means of a Glutaraldehyde-Concanavalin-A Polymer. Primary Studies on the Separated Fractions
H.-O. Nghiêm

619 Proteolysis of L-(+)-Lactate Cytochrome *c* Oxidoreductase (Cytochrome b_2) Extracted from *Saccharomyces cerevisiae* and *Hansenula anomala* Yeasts
M. Prats
